

N-island

GENERAL CONCEPT

GENERAL CONCEPT
 The N-island is a new urban development project located in the heart of the city. The project is designed to provide a high-quality living environment for its residents. The development is centered around a green corridor that runs north-south, providing a natural spine for the city. The buildings are designed to be modern and sustainable, with green roofs and energy-efficient systems. The project is also designed to be walkable and bikeable, with a network of pedestrian and bicycle paths. The overall goal is to create a vibrant, sustainable community that is integrated with the surrounding urban fabric.

- Green roof
